K-35

Characteristics

- convenient operation,
- easy putting of material,
- quiet work of machine,
- easy setting of parameters,

All components of K-35 placed on self-supporting steel frame covered by protections. All machine elements having direct contact with product are made of materials approved by the State Institute of Hygiene (PZH).

Main components

- rotatory cutting die,
- pushing out drums,
- the plate for inserting of cake,
- the tank for collecting of communicants,
- the tank for waste
- control cabinet

K-35

Specification

- | | |
|----------------------------------|--------------------------|
| 1. Communicants | |
| - the kind of material | made of cake, humidified |
| - thickness of communicant | 0.8 1.2 mm |
| - diameter of communicant | 35 mm |
| 2. The dimension of made of cake | |
| - before humidification | 305mm x 308 mm |
| - after humidification | 315mm x 320mm |
| - the thickness of cake | 0.8 1.2 mm |
| 3. The number of sheet | 1 |
| 4. Efficiency from 1 sheet | 81 pieces |
| 5. Efficiency of device | 12 cycles/min |

K-35

Engineering data

1. Power supply;
 - electrical energy 3 x 380/220 V 50(60) Hz,
 - installed power 3 KW ,
2. Dimension of machine 1200mm x 1200mm x 1500mm,
3. Weight 300 kg,
4. Protective system
 - residual current operated protection device
 - mechanical protection cover with door safety switches.
5. Service 1 person
